HENRIQUE AZEVEDO

Full-Stack Developer

+55 (83) 9812-3331 | henriquee.aze.dev@gmail.com

Portfolio | LinkedIn | GitHub

PROFILE

I am a full-stack developer with solid experience across multiple programming languages, frameworks, libraries, databases, and both front-end and back-end technologies.
Beyond mastering specific tools, my main strength is the ability to learn quickly, adapt to new challenges, and continuously grow, both personally and professionally.
More important than being tied to any single technology is always being ready to learn whatever is necessary to achieve the best results.

EXPERIENCE

MBA Consultoria & Sistemas

FULL-STACK DEVELOPER

January 2026 - Present

- **Interface Development:** Built responsive, user-friendly interfaces from prototypes using React, React Native, HTML, CSS, and Bootstrap, following architecture and design standards.
- **REST API Development:** Built scalable APIs with ASP.NET, Spring Boot, C#, and Java, integrated with relational databases such as SQL Server and applying versioning and security best practices.
- **Code Review and Optimization:** Refactored code to improve readability, performance, and adherence to system standards and architecture.
- **Version Control and CI:** Used Git, GitHub, and Azure DevOps, including Azure Repos and Azure Pipelines, to automate CI/CD and support quality and agility throughout development.

C# - ASP.NET - Java - Spring Boot - React - React Native - Angular - Bootstrap
HTML - CSS - SQL Server - Azure - Git/GitHub

TECHNOLOGIES

Java - Spring Boot - C# - ASP.NET - Python - Django - JavaScript - TypeScript - Node.js - Angular - Bootstrap - Tailwind CSS - HTML - CSS - Docker - Git/GitHub - Azure DevOps - SQL

EDUCATION

UNIFIP - Centro Universitário de Patos

2024 - 2026

Associate Degree in Systems Analysis and Development

ECIT - São Bento

2020 - 2023

Technical Diploma in Business Administration

SKILLS

- Technical English
- Professional communication
- Teamwork
- Application of SOLID principles
- Use of GRASP principles
